On behalf of the Board of Governors and the Licensed Practical Nurses, I wish to thank you for your keynote address at our recent convention, Spring Conference '93.

Your address certainly set the tone for what was our most successful conference ever. Many LPN's noted your presentation allowed them time to reflect on the importance of the role they play as practical nurses. It was most valuable to have you as a health care client reinforce the impact they have on their patients, to empower them to fully participate in their own wellness.

Many events and presentations throughout the two days made reference to your address.

Again, I thank you for participating in our conference and we wish you every success and a life time of wellness.

Rita McGregor
Education and Practice Consultant
